ORDER

This civil action is before the Court on periodic review. This case arises from the same facts as a group of related and consolidated fly-ash cases, in which Jacobs Engineering Group is also the defendant; the lead case is *Adkisson et al. v. Jacobs Engineering Group*, No. 3:13-cv-505, and the phase-one trial is set for October 16, 2018. There are also two motions pending, one of which relates to the Court's subject-matter jurisdiction.

For these reasons, this case is **STAYED** pending resolution of phase one of the group of cases led by *Adkisson*. Plaintiffs are directed to file a motion to lift this stay within **seven (7) days** of the conclusion of phase one of the *Adkisson* group of cases.

IT IS SO ORDERED.
